OBJECTIVE

Ph.D. researcher seeking to apply advanced machine learning techniques to solve complex industrial problems at Apple.

EDUCATION

Ph.D. in Computer Science (Machine Learning Focus)
Stanford University, 2023
Thesis: "Optimizing Neural Network Architectures for Edge Devices"

B.S. in Computer Science
Massachusetts Institute of Technology (MIT), 2018

WORK EXPERIENCE

Machine Learning Engineer
AI Research Lab, Silicon Valley
2023 – Present

- Designed and implemented novel computer vision algorithms achieving state-of-the-art performance on benchmark datasets.
- Optimized deep learning models using TensorFlow and PyTorch for low-latency inference.
- Published 3 papers in top-tier conferences (NeurIPS, ICML).
- Utilized C++ for high-performance computing tasks.

Research Assistant
Stanford University
2018 – 2023

- Conducted extensive research on reinforcement learning and stochastic processes.
- Developed simulation environments to test algorithmic stability.
- Taught graduate-level courses on "Introduction to AI".

SKILLS

- Core: Machine Learning, Deep Learning, Computer Vision, Algorithms
- Languages: C++, Python, MATLAB
- Frameworks: TensorFlow, PyTorch, Keras
